WIRELESS & WIRED GUEST HSIA SERVICE

Wanaport focuses on High Speed Internet Access for the hospitality industry and provides guest and meeting room wired and wireless connectivity. Wanaport uses enterprise, open standards-based industry leading products, ensuring high reliability and maximum uptime for your guest network. Our capabilities allow your property to offer a customizable guest portal, tiered bandwidth, zone access and centralized reporting.

"We have been very pleased and impressed by Wanaport. Before Wanaport was our provider, we would struggle with inconsistent Wi-Fi connections as well as unhelpful customer service with our previous provider. With Wanaport, our service has improved immensely and is reliable and consistent; they provide efficient and helpful customer service and have added incomparable value to the Wi-Fi that we provide to our guests. We are truly thankful to Wanaport for the outstanding services and commitment to excellence that they have provided to our location."

- Dianne Floryan, GM
Hyatt Place, Ontario

CUSTOM SOLUTIONS

No two properties are the same in terms of guest needs and physical layout of properties. Wanaport will work in a consultative role with the hotel management to satisfy the hotel needs and the brand standards. Wanaport will design a leading edge technology solution for your guest HSIA needs, focusing on guest satisfaction and maximum network uptime. We have helped many different types of hotels to be trouble-free when it comes to wireless and wired guest internet service.

NETWORK & SYSTEM MONITORING

Wireless networks, business center computers and printers, IPTVs and VoIP phones are just the beginning. Hotels are rapidly adding more IP enabled devices. To complicate matters more, you probably have a half dozen or more service providers responsible for managing a subset of your infrastructure.

Wanaport's remote monitoring module provides you a simple and unified view of all your IP equipment with current and historical device status, real-time alerting and more, to enable your IT and engineering staff timely and actionable information to maximize uptime and deliver a consistent and reliable guest experience.

ROBUST BILLING AND REPORTING OPTIONS

Wanaport offers software that is the optimal platform for delivering your guests high-quality bandwidth at a fair price. Our software can be configured for different pricing in different parts of your hotel, enabling lower priced Internet in guest rooms and common areas, while reserving higher priced options for conference and meeting space. Auditing and reporting features allow you to run real-time reports for night audit and monthly reconciliation.

SOME OF OUR VERY SATISFIED CUSTOMERS INCLUDE:

Marriott   HYATT   Hilton   IHG InterContinental Hotels Group
